Summary

As a Software Developer, I developed and deployed Android applications using Java and Flutter for various clients and projects. I collaborated with cross-functional teams and contributed to the design, development, testing, and maintenance of high-quality and user-friendly apps.

Employment History

SDE1

The Germane Media • Remote
02/2024 - Present

- Spearheaded mobile application development for Swift TV, a Free, ad-supported streaming TV (FAST) application.
- Sole Flutter developer responsible for conceptualizing and building the product from inception to deployment.
- Currently in active development phase; live version accessible at https://play.google.com/store/apps/details?id=com.thegermanemedia.playswift_tv
- Achieved over 100k downloads within a month post-launch, establishing a robust presence in the streaming platform market.

Mobile Application Developer

Excellis IT PVT LTD • Kolkata, West Bengal
08/2023 - 01/2024

I was working as a Flutter developer where my major tasks included implementing UIs from Figma design, integrating APIs and testing the apps, for different projects.

Mobile Application Developer

Freelance • Kolkata, West Bengal
01/2023 - 07/2023

- Worked on a freelance basis for a start-up in Kolkata in January 2023 where I have been mainly responsible for cross-platform mobile application development using Flutter, Dart, 3rd party APIs, Github, and Firebase.

Associate Software Developer

SAP Labs India • Bengaluru, Karnataka
08/2020 - 07/2022

- Joined SAP Labs India under its Scholar program, where I pursued a Master of Technology (M. Tech) in Software Engineering from Birla Institute of Technology and Sciences (BITS), Pilani under its Work Integrated Learning Program (WILP), and worked for SAP Labs as well. (where we worked on the weekdays and had classes/exams on weekends)
- Was part of three different teams during my 2 years at SAP Labs, where I got to work on technologies like Flutter, CDS views, ABAP, Python, Github, and SAP Conversational AI, following the best industry practices of software development like Agile methodology.

Professional Skills

Flutter, Core Java, Andoid Application Development, Data Structures and Algorithms, C, Python, SQL, GitHub

---

Education

Master of Technology in Software Engineering

Birla Institute of Technology and Science • Pilani, Rajasthan
07/2022

Bachelor of Technology in Information Technology

Shri Ramswaroop Memorial College of Engg. and Management • Lucknow, Uttar Pradesh
09/2020

Languages

English, Hindi

Internship

Precursor Info Solutions, Lucknow | June 2019 - July 2019

Created a fully functional Android application that used SQLite database in the back-end to store information. The application we named as *Chauffeur on Demand* was based on the idea to act as a bridge between Vehicle owners and Drivers. Vehicle owners could use the app to book from drivers available and drivers could see their bookings.

Personal Projects

FlutterDocs (Unofficial) | Flutter application for Android/iOS

A mobile application that can be used to access the official documentation of Flutter, to make it easily accessible for everyone.

ShoppingList | Android application

A simple Android application that helps in managing the lists like shopping items. The primary objective behind developing this application was to build a very simple application that solves the purpose and removes needless complexities that are there in already existing apps.
